

WE'RE HIRING ENGINEERS!

We are hiring a full time Full Stack Developer who will play a crucial role in designing, developing, and maintaining web applications end-to-end.

If you're a thinkerer - looking to design long-term strategic goals, identifying and creating suitable applications for social sector organisations, this is the spot for you!

The sectors we work with include climate, disability, operational efficiency and administrative systems for non profits (but we don't limit ourselves and neither should you).

BTech4Good

- Build and maintain web apps using Python on the backend and Vue.js or React.js/React Native on the frontend.
- Create APIs, design databases, and handle server-side magic.
- Boost app performance.
- Learn new tech stack, if and when needed (which probably means 100%).
- Work with some incredible nonprofit organisations.
- Our squad is Bengaluru based.

GOOD2HAVE

- You have a Bachelor's degree in Computer Science or IT, or a related field.
- 0-2 years work experience (prior internship experience preferred).
- Strong proficiency in Python and JavaScript.
- Familiarity with front-end frameworks such as Vue.js or React.
- Experience with relational databases like MySQL and PostgreSQL.
- Have knowledge of version control systems, especially GitHub.

BROWNIE POINTS

- You're experienced with cloud platforms like Digital Ocean/AWS.
- Know your way around containerization (e.g., Docker, Kubernetes).
- Understand the concepts of RESTful APIs and microservices architecture.
